

I don't know what I'd do if K-Love was taken away from me, my family, and my community. I listen most of the day to my local K-Love station (96.3 FM) and it lifts me up and keeps my spirits high. This station allows me to be a productive member of society, and my family is blessed by it tremendously. My husband is a new Christian and the songs and stories that are shared on K-Love are so touching. He has to drive an hour to college and an hour back three times each week, and he listens to this station both ways and on his way to work and on the way home, also. It is amazing the joy that he gets out of this. You wouldn't understand unless you experienced it for yourself. Our two sons are 19 months old and four months old, but can already enjoy K-Love. The eldest 'sings along' with the songs and the youngest laughs and giggles more when he has been listening to this station. If K-Love was removed from our area, we would be devastated and very lost without it.

If this station provides this much inspiration and uplifting to just one family, imagine what it does for the entire community as well as the surrounding communities that tune in daily.

Please, don't take our lifeline away from us!
